

Threat Assessment

'Primary' and 'Secondary' NBC targets as well as potential for natural disasters will drive the shelter design requirements for depth of cover, installation and furniture decisions.

List the number of Primary Targets (major airports, military bases and other) within a 10-mile radius.

How close are you to a large city of population over 200,000?

List the number of secondary targets (dams, power plants, refineries and other) within a 10-mile radius.

List the number of major highway interchanges within a 10-mile radius.

Is your area prone to:

Earthquakes? _____

Tornados? _____

Hurricanes? _____

Floods? _____

Wildfires? _____

How many people do you anticipate will be housed in your shelter?

Do you anticipate housing any handicapped or elderly?

What are the extremes of your temperature variations?

Would you consider your locality to have high, low or medium humidity?

How long do you think you will need to stay in your shelter?

If you would like us to evaluate these assessments, please email them to spacker@utahsheltersystems.com.
